

## **REMARKS**

The present Amendment is being filed to correct informalities in claim 1 that were noted during preparation of an Appeal Brief that is being filed concurrently. Specifically, Figure 3 of the application illustrates an authorization module 10 and an authorization server 1, and Figure 5 shows that it is a certification module 30 (rather than authorization module) that is provided in certification server 3. Accordingly, the present Amendment seeks to correct the "certification server" paragraph of claim 1 by changing the "the authorization module" to "a certification module." This modification also necessitates a change in the last paragraph of claim 1, since "a certification module" needs to be changed to "the certification module."

It is respectfully submitted that the grounds expressed in the Final Rejection and in the Advisory Action of April 5, 2010 are not affected by this corrections. Accordingly, it is respectfully requested that the present Amendment be entered for purposes of Appeal.

Respectfully submitted,
